

CAReHRTM

MADE BY ARCTECTA[®]

PUTTING CLINICIANS IN CONTROL OF HEALTHCARE DATA

CAReHR offers clinicians effective point of care decision support and clear healthcare insights on a dynamic and inter-operable data management and automation platform.

AN AGILE CLINICAL DATA MANAGEMENT SYSTEM FOR HEALTH PRACTITIONERS AND RESEARCHERS.

CAReHR is an advanced and flexible healthcare data solution developed by Arcitecta in collaboration with leading hospital specialists. CAReHR makes it easier to manage complex interdisciplinary health records through a single system that clinicians can simply and intuitively navigate from anywhere on any devices.

BY CLINICIANS. FOR CLINICIANS

A customisable platform adapts to reflect how your clinic approaches a consultation and interactions with patients.

SCALABLE SOLUTION FOR ANY SIZE PRACTICE

Our system can support any documents and forms to provide a reliable foundation so you can adapt to future demands without the need for a database specialist.

PATIENT CARE AT THE CENTRE

Streamline and optimise recording of essential information about a patient's health and wellbeing needs.

REACH BEYOND THE CLINIC WALLS

Share complex records between multidisciplinary and integrated practice groups.

PATIENT-CENTRIC INTEROPERABILITY

Advance patient care by securely exchanging and accessing information across the healthcare ecosystem. CAReHR talks to hospital central patient administration systems (e.g. iPM via HL7), interacts with My Health Record and government data exchange programs for reporting and funding purposes (e.g. DSS), exports data to national federated research databases (e.g. Biogrid), and more.

DATA SHARING & REPORTING

PDF reports for GP and patient summary notes are one click away. Printing prescriptions, referrals, pathology requests and comprehensive medico-legal reports is a breeze. CAReHR also offers powerful reporting tools for clinical insights, research statistics, and data sharing — de-identified or not — along with the ability to integrate with dashboards such as PowerBI and Tableau.

ABOUT ARCTECTA

Arcitecta was founded to create the best possible technology for handling all forms of data, to provide the capability to solve the most demanding data management problems with the simplest possible solutions.

We provide the right data, in the right place, at the right time, to ensure you realise the maximum value from your data.

We solve the problems others cannot.
